

## suitX Secures International Standards Certification for Comprehensive Quality Management System

*Maker of the Phoenix and MAX Exoskeletons Earns ISO 13485 and ISO  
9001 Certifications*

**BERKELEY, CA—May 4, 2017** - [suitX](#), a California-based robotics company specializing in the design and manufacture of medical and industrial exoskeletons, announced today that it has received ISO 13485 and ISO 9001 certifications for its systems and products, the Phoenix and MAX exoskeletons. By attaining this highly-respected level of industry certification, suitX demonstrates that it has the ability to implement and maintain a set of processes that ensure the final product reliably meets industry regulation and customer expectation.

ISO 9001 is one of the most widely used management tools in the world, with over one million organizations independently certified, setting an international standard for best practices in quality management.

The ISO 13485 (specifically ISO 13485:2003) standard is based heavily on the requirements of the ISO 9001, but with a greater focus on the design and manufacture of medical devices.

“We are so pleased that suitX has been awarded these two ISO certifications. Now our customers can be assured that suitX operates with an internationally-recognized quality management system,” said Dr. Kazerooni, CEO, suitX. “We put a great deal of time and energy into making sure our engineering, production and sales channels are as efficient as possible. Having ISO certification for our products provides our stakeholders and customers with an objective validation of the importance we place in the quality of our products and processes.”

## **About suitX**

[suitX](#) is a robotics company designing and manufacturing both medical and industrial exoskeletons that address common problems faced by workers and people with gait impairment to improve everyday life. suitX has received Series A investments, been awarded a few US government awards, and won two Saint-Gobain NOVA Innovation Awards. suitX also won the \$1M USD Top Prize in the UAE AI and Robotics for Good Competition. suitX is currently looking for prominent strategic partners and financiers for global expansion.
